## DETAILED ACTION

The Amendment filed on 01/30/06 has been received and entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-11 and 13 are rejected under 35 U.S.C. 102(a) as being anticipate by admitted prior art.

The admitted prior art (Fig. 1) shows all the elements as recited in claims 1-11 and 13 as follows:

at least one sense amplifier having Active, Standby and Sleep modes thereof coupled to complementary bit lines, said amplifier having first and second voltage nodes (112 and 124) thereof;

a first transistor (116) coupled said first node to a first voltage source (Vcc), a control terminal of said first transistor being coupled to receive a first control signal (LPB); and a second transistor (122) coupling said second voltage node to a second voltage source (ground), a control terminal of said second transistor being coupled to receive a second control (LNB), wherein, In a Standby Mode of operation, said first

control signal is substantially at a level of said first voltage source and said second control signal is substantially at a level of said second voltage source.

***Allowable Subject Matter***

3. Claims 21-35 are allowed.
4. Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1-11 and 13 have been considered but are moot in view of the new ground(s) of rejection.
